## PharmaFluor® FEP Tubing

PharmaFluor® FEP is a fluoropolymer tubing that meets the demands of biopharmaceutical, medical and laboratory applications. PharmaFluor® tubing has outstanding chemical and physical characteristics because processing occurs under stringently controlled conditions. In addition to being chemically inert, PharmaFluor® tubing can be used in a broad range of temperatures, from -100°F to 400°F.

## PharmaFluor® Characteristics

Fluid integrity is an obvious area of concern in biopharmaceutical, medical and lab applications. PharmaFluor® FEP will resist the absorption/adsorption of aqueous fluids, which minimizes the risk of fluid alteration in single or repeat use applications. PharmaFluor® tubing is also virtually unaffected by chemical sanitizers and cleaners and can be cleaned repeatedly without decreasing its service life.

## Biocompatibility

PharmaFluor® FEP complies fully with the requirements of USP Class VI and all current ISO standards, and is entirely non-cytotoxic, non-pyrogenic and non-hemolytic. To ensure the superior characteristics of PharmaFluor® FEP, the following tests were also performed: Genotoxicity Tests, Bacteriostasis-Fungistasis Tests, Physiochemical Testing for Elastomeric Closures (USP <381>) and Physiochemical Testing for Plastics (USP <661>). PharmaFluor® FEP has a Master File with the U.S. Food and Drug Administration.

## Features/Benefits

- Chemically inert
- Ultra-pure
- Documented biocompatibility
- Fully characterized to all current standards
- Non-cytotoxic, non-pyrogenic and non-hemolytic
- Extremely low sorption characteristics compared to other flexible tubings
- Fully autoclavable and sterilizable
- Excellent barrier with very low permeability

## Typical Applications

- Sterile filling and dispensing systems
- Diagnostic equipment
- General laboratory use
- Cell and tissue culture transport
- Analytical and process equipment in biotechnology, biopharmaceutical and environmental fields

## Connections

- PharmaFluor® fluoropolymer fittings

Moisture Absorption, %	D570	<0.01%
Effect of Weathering and UV Exposure	—	none

The values listed for working and burst pressures are derived from tests conducted under controlled laboratory conditions. Many factors will reduce the tubing's ability to withstand pressures including temperature, chemical attack, stress, pulsation and the attachment to fittings. It is imperative that the user conduct tests simulating the conditions of the application prior to specifying the tubing for use.

## PharmaFluor® PFA Compression Fittings

Saint-Gobain manufactures PFA fittings for handling corrosive or ultra-pure fluids under contamination-free conditions. The PharmaFluor® compression fitting line offers PFA purity combined with the robust performance of compression style fittings. These fittings are ideal for gas or pneumatic connections in applications that do not require flared connections. Once tubing has been cut to the desired length, PharmaFluor® fittings require no tools for installation. The fittings are available in 1/8", 1/4", 3/8", 1/2", 3/4" and 1" sizes.

We use 100% virgin HP PFA to give you the ultimate in purity and the minimum in contamination. Each PharmaFluor® PFA fitting is carefully inspected to ensure quality and reliability in your application and throughout the life of the product. Fluid handling applications in the biomedical, chemical, petrochemical, food processing and semiconductor industries benefit greatly from the use of these fittings.

Whether it be a simple fluid handling system or a complex laboratory layout, PharmaFluor® PFA fittings save precious time and money, and provide all the reliability needed to facilitate successful outcomes.

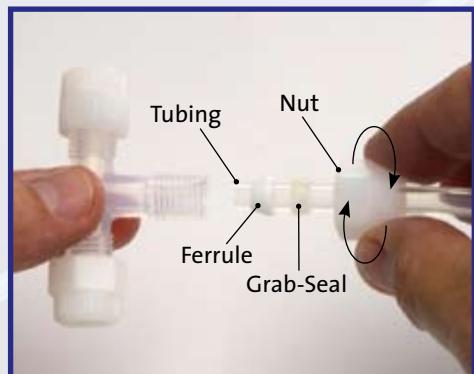

### Features/Benefits

- Simple design for ease of installation
- No special tools required
- Accommodates temperatures up to 212°F (100°C)

### Materials of Construction

- Body: high purity PFA
- Gripper: PVDF
- Ferrule: PTFE
- Nut: ETFE

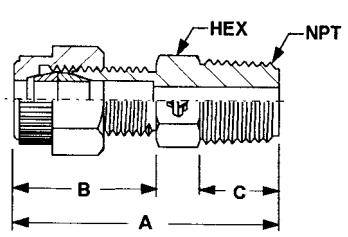

### Fitting Installation

1. Cut tubing to desired length.
2. Loosen nut, insert tube.  
(your pre-assembled fitting should be ready for use)
3. Tighten nut finger-tight.
4. Your fitting is now ready for use.

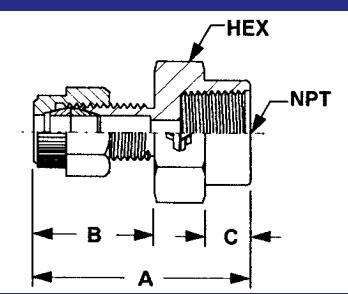

No tools are required, but if you decide to use a mechanical device to tighten it, rotate the nut no more than one turn past finger-tight.
